STATEMENT OF ANTHONY V. CRUZ

I, Anthony V. Cruz, state that:

1. I am identified as a joint inventor of U.S. Patent Des. 417,129.

1. I was an original, first, and joint inventor of the invention disclosed and claimed in the above identified utility patent application no. 09/228,109.

2. Through error without deceptive intent on my part, I was not identified as an inventor when the above-identified application was originally filed.

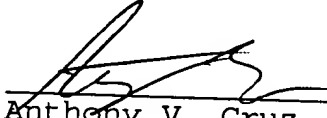

3. My contribution to the subject matter disclosed and claimed in the application was made while I was an employee of Hamilton Beach/Proctor-Silex, Inc., which then had a place of business at Glen Allen, Virginia. Martin Brady, who was originally identified as the sole inventor of the invention claimed in the application, was at the time of the invention and, on information and belief, still is employed by Hamilton Beach/Proctor-Silex, Inc.

4. When the above identified application was filed, I believed that I was a joint inventor along with Martin Brady of the design of the opening appliance, which is the subject of U.S. Design Patent Des. 417,129, but that I believed that I had not contributed to the utility aspects of the opening center. On or about January 22, 2005, during a telephone conversation with

Application No. 09/228,109
Statement of Anthony V. Cruz
Page 2

Martin Brady, I recalled that both Mr. Brady and I had contributed to the invention of utility features of the opening center because I proposed the provision of a scissors holder that engages and holds a scissors inside the sheath at the rear of the appliance.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
